Air can be used in a variety of ways to make lightweight, flexible structures. It can be used to make inflatable structures, mobile structures, and temporary buildings, it can also activate movable elements and act as a means of constructing buildings that would be impossible with conventional construction methods.

ASATI - AIR STRUCTURE

Governed by the core values of integrity and dedication, ASATI is always the innovator, never the imitator. So when you build, build with experience.

Printable Air Structures: Pressure of the Court

Despite the uniqueness of their structural systems, air structures are not an experimental form of technology. The basic concept was developed and refined in the 1950s for military and industrial use and they have been in wide-spread use since the early 1960's. To date, there have been more than 10,000 air structure installations world-wide, including applications for the enclosure of missile

[Lloyd Turner s Balloon Form Invention - Mortar Sprayer](#)

As a young architect in the 1960's, Lloyd Turner dreamed of curves and concrete in architecture. He pursued an idea to step away from the widespread use of wood framing, and designed an inflated balloon form for thin shell concrete structures.

[Air Domes and Inflatable Buildings Mean You Play More ...](#)

An inflatable building is a fraction the cost of traditional brick-and-mortar facilities. And it can be up much sooner. Plan well, and you can support all kinds of activities under one dome, turning your turf into a source of revenue.

[Products Air-Supported Structures Domes Bubbles Sports ...](#)

What is an air-supported structure? An air-supported structure, also known as a dome or a bubble, is a truly unique building system. A slightly higher air pressure inside the dome supports the entire structure fresh air constantly cycles into the structure to maintain this slightly higher internal pressure.
