[Cancer: How Worthwhile Is Non-Curative Treatment? - Google ...](#)

Cancer is a major issue in the provision of health care. It is estimated that one in four people in developed countries are likely to develop it at some time. As longevity steadily increases, the incidence of malignant disease is expected to rise further. Important advances in the control of cancer have taken place and curative treatment has improved, notably in some of the rarer tumours, particularly in children. Advances in the more common cancers have been less marked, although adjunctive
