Diffusion - Wikipedia

Diffusion is the net movement of molecules or atoms from a region of higher concentration (or high chemical potential) to a region of lower concentration (or low chemical potential).

Diffusion | Definition of Diffusion by Merriam-Webster
Diffusion definition is - the state of being spread out or transmitted especially by contact; the action of diffusing. How to use diffusion in a sentence.

Diffusion | physics | Britannica.com

Diffusion: Diffusion, process resulting from random motion of molecules by which there is a net flow of matter from a region of high concentration to a region of low concentration. A familiar example is the perfume of a flower that quickly permeates the still air of a room. Heat conduction in fluids involves

Diffusion and Osmosis - Difference and Comparison | Diffen

Osmosis is the result of diffusion across a semipermeable membrane. If two solutions of different concentration are separated by a semipermeable membrane, then the solvent will tend to diffuse across the membrane from the less concentrated to the more concentrated solution.

Diffusion | Define Diffusion at Dictionary.com

Movies, a soft-focus effect resulting from placing a gelatin or silk plate in front of a studio light or a camera lens, or through the use of diffusion filters.

Diffusion | definition of diffusion by Medical dictionary
diffusion [d-fu-zhun] 1. the state or process of being widely spread. 2. the spontaneous mixing of the molecules or ions of two or more substances resulting from random thermal motion; its rate is proportional to the concentrations of the substances and it increases with the temperature. In the body fluids the molecules of water, gases, and

Diffusion | Article about diffusion by The Free Dictionary

Solids. Diffusion in solids is an important topic of physical metallurgy and materials science since diffusion processes are ubiquitous in solid matter at elevated temperatures.

Diffusion - Biology-Online Dictionary | Biology-Online ...

Biology-online is a completely free and open Biology dictionary with over 60,000 biology terms. It uses the wiki concept, so that anyone can make a contribution.

What is diffusion? - BBC Bitesize

Diffusion is the movement of a substance from an area of high concentration to an area of low concentration.

[\(hot Topics\)](#)

Diffusion happens in liquids and gases because their particles move randomly from place

[Diffusion - Simple English Wikipedia, the free encyclopedia](#)

Diffusion is a physical process where molecules of a material move from an area of high concentration (where there are many molecules) to an area of low concentration (where there are fewer molecules).
