[Dive Tables and Decompression Models | DIVER magazine](#)

Even today, divers are faced with a diversity of tables and decompression models incorporated into diving computers. Some are simple re-configurations of the basic U.S. Navy tables and others are distinctly different in their approach to decompression management.

Risk Stage-decompression diving also tends to result in longer in-water exposure times, greatly increasing the chance of hypothermia. Risk The extended exposure time also equates to increasing the odds of experiencing a problem while under water.

[What Is a No-Decompression Limit \(NDL\) in Scuba Diving?](#)

A no-decompression limit (NDL) is a time limit for the amount of time a diver can stay at a given depth. No-decompression limits vary from dive to dive, depending upon depth and previous recent dive profiles.

Table One is the No-Decompression Limits (NDL) and Repetitive Group Designation Table showing the maximum times a diver can stay at a set depth, without having to perform a decompression stop.

NAUI Table 1, the End-of-Dive Letter Group Table on the upper right of the plastic dive table, shows that the Maximum Dive Time (or MDT) you can stay at that depth without having to make a decompression stop is 55 minutes (if you have enough air; that is).

[Decompression Diving 101 Scuba Diver Life](#)

Decompression diving, or deco diving, means intentionally going beyond No Decompression Limits (NDLs) to achieve a longer bottom time at a given depth. This could mean spending an hour at 100 feet (30 m) or 20 minutes at 164 feet (50 m), depending on your dive's objectives.

There are, of course, limits to both depth and bottom time for tec diving. You won't spend two hours at 330 feet (100

#### **Decompression Diving - What Is It and Should I Avoid It ...**

The term decompression diving is sometimes confusing for beginning divers. It brings forth the images of complicated formulas and in depth planning. They are told that it is just for technical divers who have vast amount of training and it not for mere recreational divers. They are right mostly, however, that does not mean that the recreational diver should not be aware of the topic and
