[How the Brain Works](#). The brain controls your ability to think, talk, feel, see, hear, remember things, walk and much more. It even controls your breathing. The brain is a soft mass of supportive tissues and nerves connected to the spinal cord. Some of the nerves in the brain go right to the eyes, ears and other parts of the head. Other nerves

connect the brain with other parts of the body

Slide show: How your brain works - Mayo Clinic

Your brain contains billions of nerve cells arranged in patterns that coordinate thought, emotion, behavior, movement and sensation. A complicated highway system of nerves connects your brain to the rest of your body, so communication can occur in split seconds. Think about how fast you pull your hand back from a hot stove. While all the parts of your brain work together, each part is
