The possibilities for shop projects are endless with this simple jig for bending sheet metal. Learning how to work with sheet metal can open up a lot of potential for practical projects. In this plan, we'll show you how to build and use a simple bending brake like you see here.

[Technical - TOOLS, How to Build a Sheetmetal Brake for 10 ...](#)

Technical TOOLS, How to Build a Sheetmetal Then just use a big crescent wrench as a handle on the hinged angle, and raise the brake to bend the metal. We ended up gussetting the angle on the brake, and adding a truss to it to keep it from bending. We could do 20-gauge 3 feet wide, 18-gauge 2 feet wide, and 16-gauge between 1 and 1-1/2 feet wide. The materials really did cost less than 10

[30 in. Bench Top Metal Bending Brake | Princess Auto](#)

Accurately form metal boxes, covers, trays and more with this all-steel benchtop bending brake. It bends 17-gauge metal up to 90 and includes holes in the base for quick, easy mounting. It bends 17-gauge metal up to 90 and includes holes in the base for quick, easy mounting.

**Dave's Cheap Sheet Metal Bending Brake - [biplaneforum.com](http://biplaneforum.com)**

Dave's Cheap Sheet Metal Bending Brake I started building my Zenith CH601XL from plans in mid January 2006. After several failed attempts to bend the rudder spar I ended up going to a local sheet metal shop for help. The problem with that is that their equipment is not set up for the 1/8 inch radius bend specified in the plans. I saw right away that some type of bending brake was going to be **Sheet Metal Bender Brake Free full set Plans and materials**

SheetMetal Brake Free full set Plans and materials. The basic plan is the same for the simple and the modified version. You can view the whole step by step building process at three video parts:
