Migraine More than a Headache - Hopkins Medicine

Migraine More than a Headache by Drs. Michael Teixido and John Carey . Introduction . Migraine is a common clinical problem characterized by episodic attacks of head pain and associated symptoms such as nausea, sensitivity to light, sound, or head movement. It is generally thought of as a headache problem, but it has become apparent in recent years that many patients suffer symptoms from

Migraine - Wikipedia

A migraine is a primary headache disorder characterized by recurrent headaches that are moderate to severe.

Typically, the headaches affect one half of the head, are pulsating in nature, and last from two to 72 hours.

Associated symptoms may include nausea, vomiting, and sensitivity to light, sound, or smell. The
