Neurophysiological correlates of color vision: a model

Correlates of color vision 215 improved response simulations with values of n usually larger than 0.7. The general version of Eq. (4) is given in Eq.

Cognitive Aspects of Color - imaging.org

behavioral, neuropsychological, and neurophysiological data. Color is usually defined as psychophysical color or as perceived color. Behavioral data on categorical color perception, absolute judgement of colors, color coding, visual search, and visual awareness refer to the more cognitive aspects of color. These are of major importance in visual synthesis and spatial organization, as already
